USAF Declass/Release Instructions On File

7 Peteruary 1961

MEMORANDOM FOR: Chief, Machine Division

SHALLECT

: Bevised Processing Procedure for Air Force Documents

- 1. The Air Force (AFCIN-3D) has discontinued the entenstic discontinuation of their Air information reports; therefore effective 23 January 1961 AFCIN is providing Document Rivision with 6 copies of each report about 2 weeks in advance of the AF code sheet. AFCIN will them send each code sheet with a senseth copy of the report for further processing by Boument Rivision. Each report not indexed by AFCIN will be identified by the term NOT MINICORNO on the face of each copy of the report. No AF code sheet will be received for the NOT MINICORNO report.
- 2. To date only one shipment of Air Force reports under this arrangement has been received, but it is imperative that a new processing procedure be established promptly.
- 3. It is proposed that the new procedure provide for immediate dissemination of the first 6 copies with the filming of one of these copies for the sperture file to emple the Library to process requests generated by routed dissemination depies. The seventh copy, received subsequently with code cheet attached, would be used for interpreting the codes and typing the intellectan mats. This seems to be the only feasible approach; but it presents some problems with single-copy enclosures which must be seen by the typist, and the real and flash numbers which must be typed on the mats.
- 4. It is requested that machine procedures affected by the above be reviewed and that this office be advised of your recommendations.
